**ATHLETE INSPIRED
WORKER APPROVED**

Athlete Inspired, Worker Approved

Since 2008, Solid Gear has developed high-performance safety footwear for workers whose moves matter – the ones who treat every shift like a workout and lock in to get the job done.

Our philosophy.

Every one of our products is a statement that protecting yourself and performing at your best aren't a trade-off. From lightweight occupational wear to heavy-duty protection, we build products for the full spectrum of work. The standard never changes. Best materials. Latest technology. Zero compromise. If it doesn't make you better at your job, it doesn't leave our hands.

01

Built for how you work.

We study how you move. We listen to what you feel. Because real performance starts on the floor, not in a boardroom. Every design decision traces back to the worker – the weight on your feet, the hours in your legs, the shift that never slows down.

02

The best materials. No exceptions.

We partner with the best in material science and technology – constantly pushing every component further. Lighter without sacrificing protection. Stronger without adding bulk. The materials evolve so your performance doesn't plateau.

03

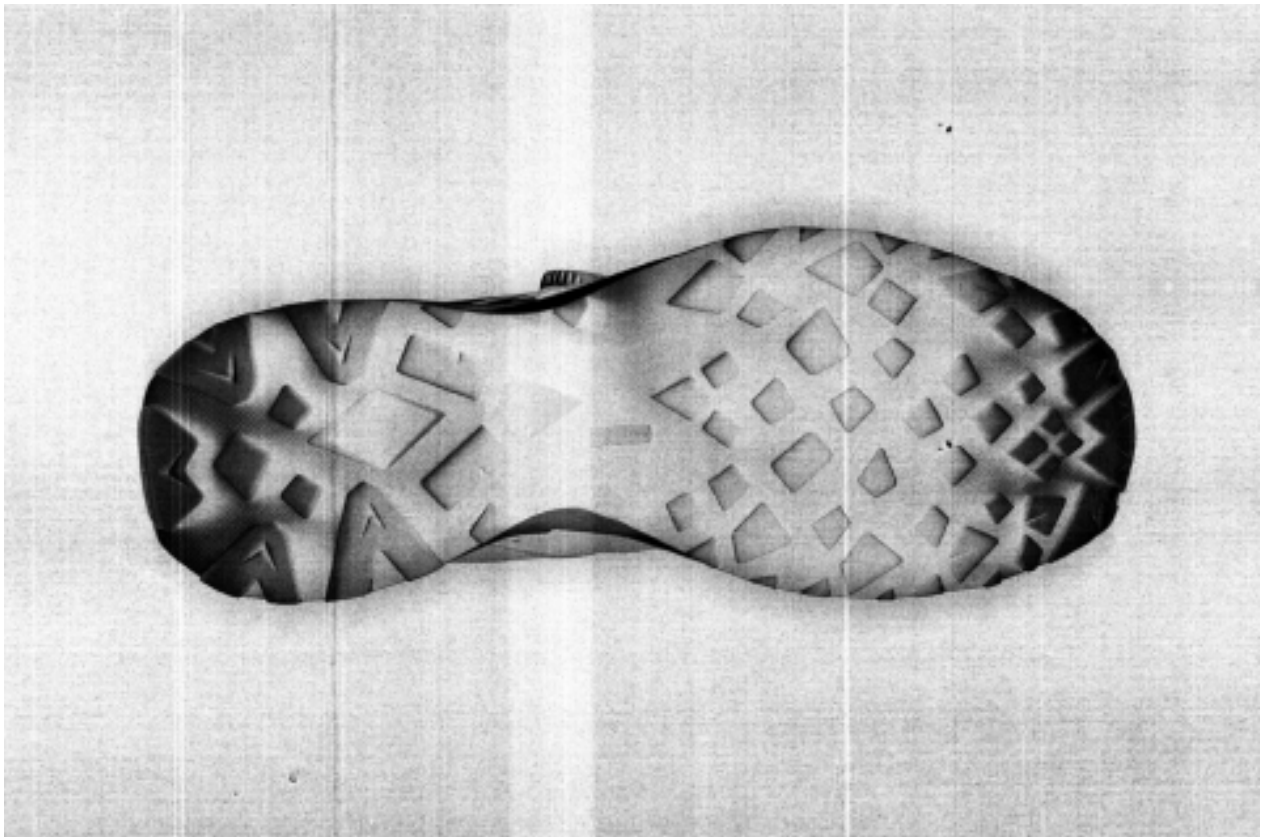

Lab tested. Reality checked. Certified.

Good enough isn't in our vocabulary. Every product goes through the kind of testing that doesn't stop at the bar – it clears it, then raises it. On safety. On performance. On everything.

Project Circuit

Our long-term initiative to explore a more circular era of safety footwear – rethinking how it's built, what it's made from, and how it's recycled. These are our first steps.

Circular Performance Chassis™

Our modular sole unit that's designed to deliver work performance and more efficient recycling. It's built from TPU-based Circuit Components molded together through Supercritical Foaming, creating a monomaterial sole unit without any adhesives. When it's worn out, we're set up to take it back and reuse the TPU in next-gen Circular Performance Chassis™ through our recycling system.

Circuit Components

- CC_Cage Zero-tolerance heel clip locking the heel into place.
- CC_Core Shank with torsional stability, giving a defined flex point.
- CC_Charge Midsole with explosive rebound and cloudlike cushioning.
- CC_Case Protective foil increasing durability and abrasion resistance.
- CC_Cling Outsole with ultra-secure grip and industry-leading durability.

REVO 3 AIR LOW ^{NEW}

S1PS

Revo 3 Air Low is the first product running the **Circular Performance Chassis™**. Made to come alive in warehouses, carpentry, and service – places where your body is always in motion. With improved underfoot response, upgraded comfort, and a new focus on what happens when the shoe is worn out, this lightweight, elite-running-shoe-inspired safety shoe aims to prove that circularity equals performance.

- The 3-piece Circuit Components layout inside the **Circular Performance Chassis™** delivers a precise balance of energy, stability, and grip.

- A seamless **MATRYX®** weave upper and **BOA® Fit System** lock in a secure, dialed fit that follows your every move.

- A mesh window in the upper keeps your feet in the right temperature zone when the pace picks up.

Revo 3 Air Low has everything needed for top performance in its class. Safety features: **NANO** toe cap and soft nail protection.

Upper:	MATRYX® (polyester, polyamide and polyurethane)
Lining:	Polyamide and polyester
Outsole:	TPU (CC_Cling)
Midsole:	TPU (CC_Charge)
Footbed:	PU foam with highly breathable recycled materials and dope dyed textile
Function:	BOA® Fit System
Fit:	Wide
Sizes:	35-48
Safety standard:	EN ISO 20345:2022+A1:2024 S1PS, SR, FO, SC
Protection:	NANO toe cap and soft nail protection

ELITE RUNNING-SHOE DNA AND UNCOMPROMISING SAFETY IN ONE

REVOLUTION 2

S3

Revolution 2 integrates the complete **ETPU** technology. The more energy you give, the more you get back. The shoe provides cushioning and comfort for endless hours of walking while reducing pressure. The lightweight **CORDURA®** ripstop and the stretch material provides an amazing feeling in terms of fitting and cushioning. By the end of the day you will have a completely different feeling in your feet and body, compared to using traditional safety shoes. To provide optimal protection without sacrificing comfort and sustainability, Revolution 2 uses the specially developed high rebound **OrthoLite®** insole mainly made of recycled materials. Revolution 2 will be the gamechanger in terms of cushioning and lightweight, while not only focus on safety when concentrating technologies in the product. **ESD** function according to EN IEC 61340-5-1:2016.

Upper: Lightweight CORDURA® ripstop with TPU reinforcements
Lining: Stretch and mesh
Outsole: Oil and slip resistant dual rubber
Midsole: ETPU
Footbed: PU foam with highly breathable recycled materials
Function: BOA® Fit System
Fit: Normal
Sizes: 36-48
Safety standard: EN ISO 20345:2011 S3, SRC, HRO
Protection: NANO toe cap and soft nail protection

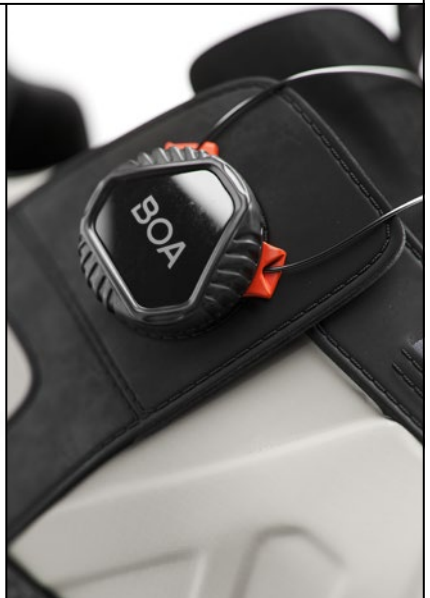

MAX PERFORMANCE SAFETY SHOE FOR FAST WORK

<h1>REVOLUTION 2 MONO LOW</h1>		S3S
<p>Make work run faster from start to finish. Equipped with an ultra-responsive ETPU midsole, grippy rubber outsole, and OrthoLite® Hybrid insole this shoe is all about comfort and performance. Featuring a CORDURA re/cor™ ripstop upper, redesigned tongue, and the all-new recycled heel counter it turns the revolution up yet another notch. To top it off it has a NANO toe cap, a BOA® Fit System, and a clean monochrome colorway with a splash of that signature Solid Gear orange. ESD function according to EN IEC 61340-5-1:2016.</p>		<p>Upper: CORDURA re/cor™ ripstop nylon Outsole: Oil and slip resistant dual rubber Midsole: ETPU Footbed: OrthoLite® Hybrid Insole Function: BOA® Fit System Fit: Normal Sizes: 36-48 Safety standard: EN ISO 20345:2022+A1:2024 S3S, SR, HRO, FO Protection: NANO toe cap and soft nail protection</p>

Soft nail protection

NANO toe Cap

REVOLUTION 2 GTX MID

S7S

This safety boot doesn't shy away from tricky conditions, and with it on, neither will you. It's based on a comfy, rebounding **ETPU** midsole and a **Michelin®** rubber outsole that inspires confidence on the slipperiest of surfaces. To ensure weather is no obstacle, it features a durable **GORE-TEX** lined **CORDURA re/cor™** upper, while a **Dyneema®** wrapped **BOA® Fit System** ensures your feet stay in place. An **OrthoLite® Hybrid™** insole provides an orthopedic fit, and a **NANO** toe cap keeps your toes safe. The Revolution 2 GTX Mid is built to inspire confidence in everyone who steps foot in it. So, let's go get it.

SEA

S3

Sea creates a superior combination between stability and cushioning. This result is reached by a durable leather upper with a new insole board construction and a high cushioning poured PU midsole. In addition, this comfortable shoe offers great grip thanks to the pattern and compound on the rubber outsole. Solid Gear Sea also provides great ergonomics and stability with the same rebound feeling as a sport shoe. Non-metallic toe cap and nail protection. **ESD** function according to EN IEC 61340-5-1:2016.

Upper: Premium leather
Lining: Mesh
Outsole: Oil and slip resistant rubber
Midsole: Poured PU
Footbed: Highly breathable PU foam
Fit: Wide
Sizes: 35-48
Safety standard: EN ISO 20345:2011 S3, SRC, HRO
Protection: Fiberglass toe cap and soft nail protection

- Safety standard:** EN ISO 20345:2011 S3, SRC, WR
- Protection:** Fiberglass toe cap and soft nail protection

SHIFT GTX LOW / SHIFT GTX MID ^{NEW}

S7S

Engineered for those who treat every shift as a chance to improve from first task to last. Powered by the **Circular Performance Chassis™** and lined with **GORE-TEX**, it feels at home on the muddiest construction sites, with the power to drive you out of the sludge when you need to. This is a safety shoe with tech that makes gnarly conditions manageable.

- The 5-piece Circuit Components layout of the **Circular Performance Chassis™** is tuned for energy, stability, grip, heel hold, and durability in one system.
- A one-piece knitted heel architecture and **BOA® Fit System** lock in a seamless, secure fit that stays put.
- **GORE-TEX** membrane optimized for breathability keeps you pushing through bad weather instead of working around it.

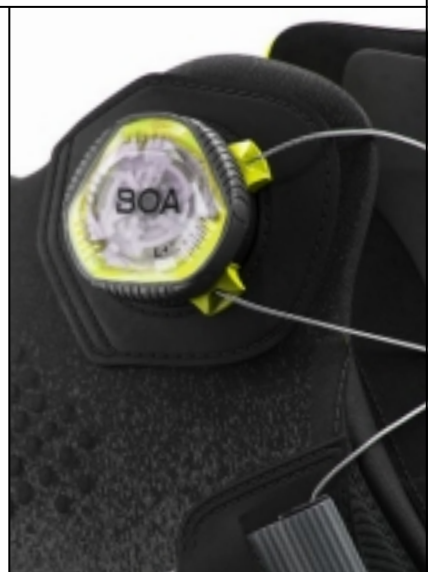

Shift GTX are safety shoes built to shift what you expect from work performance and to push you further. Safety features: fiberglass toe cap and soft nail protection.

Heavy Thermo Winter Sock is a warm winter sock in Merino Wool. Merino Wool is a natural moisture carrier, which keeps you dry and comfortably warm in any weather. Solid Gear Heavy Thermo Winter is reinforced in the heel and toe to increase wear resistance. Merino Wool allows the sock to dry quickly, eliminates odor and itch.

Material: 54% Merino wool
44% Polyamid Nylon
2% Elastane

Sizes: 35-38, 39-42, 43-46, 47-49

HEAVY THERMO WINTER SOCK

Art: SG30004

Active Sock 3-pack is a sock with extra cushioning in heel and toe. The sock is knitted in the highest quality and has an ergonomic fit with moisture and odor repelling material. Add to that, the sock is very soft and flexible, which helps prevent blisters, sores and calluses.

Material: 46% Cotton
38% Nylon
14% Polypropylene
2% Elastane

Sizes: 35-38, 39-42, 43-46, 47-49

ACTIVE SOCK 3-PACK

Art: SG30005

Performance Winter Sock 2-pack is a soft and warm sock for really cold winter days. It is made of Merino Wool and provided with a thicker bottom, which gives great insulation and comfort. The sock is also reinforced in the shaft for extra protection when wearing high winter boots.

Material: 33% Merino wool
33% Acrylic
34% Polyamide

Sizes: 35-38, 39-42, 43-46, 47-49

PERFORMANCE WINTER SOCK 2-PACK

Art: SG30007

Ultra Thin Wool Sock is a sock that is designed to provide maximum breathability. Supporting the Achilles tendon and ventilation zones on upper foot makes them really comfortable. The seamless toe reduces the risk of chafing and the thin cushion underneath provides comfortable cushioning.

Material: 51% Nylon
47% Merino wool
2% Elastane

Sizes: 35-38, 39-42, 43-46, 47-49

ULTRA THIN WOOL SOCK

Art: SG30008

Extreme Performance Summer Sock is according to us the ultimate summer sock. We have combined the best materials with the latest and most advanced technology in sock manufacturing. Adapted from the right and left foot for a perfect fit. The sock has a seamless toe for optimal fit and breathable zones. This is a sock that needs to be experienced.

Material: 48% Coolmax
38% Nylon
10% Nanoglide
2% Copper
2% Elastane

Sizes: 35-38, 39-42, 43-46, 47-49

EXTREME PERFORMANCE SUMMER SOCK

Art: SG30016

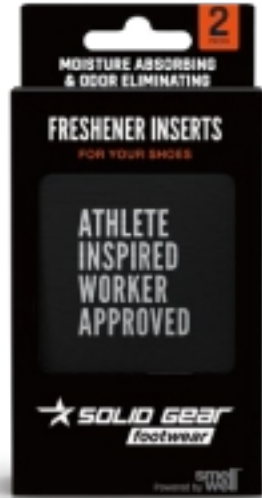

Low and sporty. This thin and lightweight sock is made with the recycled and bio-based Phoenix polyamide yarn. Maximized ventilation as well as reinforced in toe and heel area. Looks and feels great together with knitted low shoes from Solid Gear. 2-pack.

Material: 54% Polyamide
43% Recycled polyamide
3% Elastane

Sizes: 35-38, 39-42, 43-46, 47-49

LIGHT PERFORMANCE SOCK LOW 2-PACK

Art: SG20032

The Solid Gear branded **SmellWell** freshener inserts have a natural 3-in-1 solution that effectively absorbs moisture, removes odors, and leaves a long-lasting fresh scent. Just throw them in your shoes and experience a real difference!

One box includes two freshener inserts.

SMELLWELL ACTIVE AIWA

Art: OrthoLite Hybrid Insole SG21002 | OrthoLite Hybrid Insole Wide SG21009

Solid Gear and **OrthoLite® Hybrid™** comes with an unprecedented share of eco-content in an insole. The pending patent formulation uniquely blends recycled rubber and production waste foam, which gives a total of 40% eco-content for uncompromised performance with less impact on the planet. This insole comes as standard in selected Solid Gear styles, depending on last widths. After continues use for six months, we recommend that you switch the original insole to a new fresh one certified with Solid Gear. Also suitable for shoes with **ESD** function.

TECHNOLOGIES

We know we talk about it a lot, but it's for good reason. We only collaborate with top-of-the-line technology brands. Brands that, like us, push the limits, innovate, and think outside the box. So just like your running shoes feature bouncy midsoles for that extra bit of energy in your step, and your hiking boots have a waterproof membrane to keep your feet dry – so do our safety footwear. All for that extra bit of performance at work.

CC_CORE

The CC_Core shank is engineered to lock in torsional strength and stability, defining the shoe's flex point and profile so every stride feels controlled, efficient, and secure.

CC_CHARGE

The CC_Charge midsole is tuned for responsive rebound and cushioned strides, with impact absorption that keeps every move light and efficient over time.

CC_CASE

The CC_Case foil is engineered to add a layer of abrasion resistance and durability, protecting high-wear zones of the sole unit through repeated impact and surface contact.

CC_CAGE

The CC_Cage heel clip is engineered for zero-tolerance heel lockdown, anchoring the foot in place so every step lands stable and aligned from heel strike to toe-off.

CC_CLING

The CC_Cling outsole is engineered for ultra good grip and long-lasting durability, built to perform on a wide range of surfaces so workers can stay steady and confident from first step to last.

ETPU

Soft and durable ETPU foam made from expanded TPU deliver long-lasting comfort, energy-return and bouncy cushion.

MATRYX®

Exceptionally breathable and strong upper material weaved from aramid fibers and individually coated polyamide yarns. Provides long-lasting protection, flexible support, and abrasion resistance.

BOA® FIT SYSTEM

With micro-adjustable dial and a super-strong lightweight lace the BOA® Fit System delivers micro-adjustable precision fit, engineered to perform in the toughest conditions.

ORTHOLITE® HYBRID™

OrthoLite® foam insoles are lightweight and breathable and feature built-in moisture management and are made from recycled materials.

NANOTOE

NANO Carbon composite material is 40% stronger than regular fiberglass. Thinner wall design provides more room for better comfort. Meet all international standards, including ASTM, CSA, EN 125685. It's the first pair of safety toe cap made of NANO carbon technology in the world. Bring your shoes excellent comfort, light weight, and strong protection, with the most innovative technology.

STARKNIT

Solid Gear StarKnit is an upper constructed as one solid piece. Polyester yarn is knitted together in a precise and detailed process that provides a feather light, glove like fit without any seams. Because of its ability to vary in thickness across the upper, the StarKnit is called a smart construction. The knit is adjusted depending on what function it needs to fill, being thicker in areas where you need more protection and lighter where you need higher breathability and flexibility.

YKK™

Industry-leading zippers with the highest quality. Founded in Japan in 1934, YKK™ is the world's leading manufacturer of zippers with facilities in over 70 countries. YKK™ zippers can be found in everything from clothing and sports equipment to bags and personal protection equipment like safety footwear.

MICHELIN®

Snowstorms, wet streets, icy concrete – wherever work takes you, Michelin® outsole is both super grippy and extra durable. Inspired by MTB tires, the innovative lug designs grabs the ground and multidirectional patterns help shed water and snow for secure contact with the ground.

FIBERGLASS TOE CAP

Our fiberglass toe cap is lighter and safer than traditional toe caps. In addition, it features a multilayer technology which creates a roomier toe box and a sporty appearance. Fiberglass is a non-conductive and metal free material. CE Fiberglass toe cap is certified to withstand the EU standard safety regulation.

CORDURA®

CORDURA® is a highly durable and hard-wearing fabric with an effective feature allowing feet to breathe.

APXLOQ

The APXloq heel counter is engineered to maximize heel hold and comfort by following the curve of the heel, improving speed and performance at work.

VIBRAM®

Vibram® is an extra durable and rugged sole designed to provide an extremely strong grip on uneven surfaces. Vibram® outsoles comes in both rubber and TPU where the rubber outsole is heat-resistant and can withstand temperatures of up to 300°C.

ESD

ESD protection ensures that static electricity is discharged. The shoes have a resistance ranging between 0,1 Mohm and 100 MOhm according to BS ISO IEC 61340-4-3:2018.

GORE-TEX

The GORE-TEX membrane is comprised of billions upon billions of small holes that are 20,000 times smaller than a water droplet, but 700 times larger than a water molecule. This lets water vapor escape but keeps water droplets out – making it fully windproof, waterproof, and at the same time breathable.
